PROFESSIONAL SUMMARY

Cybersecurity engineering student specializing in DevSecOps, SOC operations, SIEM monitoring, threat detection, and incident response. Hands-on experience securing CI/CD pipelines and containerized microservices architectures (SAST, container scanning, supply chain signing, admission control, runtime security), as well as security automation using Wazuh, TheHive, MISP, Cortex, and Shuffle. Focused on application and pipeline security auditing, detection engineering, and building end-to-end DevSecOps workflows.

PROFESSIONAL EXPERIENCE

DevSecOps Intern – LinSoft *Jun – Aug 2026*

- Built a full DevSecOps CI/CD pipeline (GitHub Actions) for a microservices architecture on OpenShift, from source code to runtime security.
- Applied SAST, container scanning, and image signing (Cosign), enforcing Kyverno and Falco policies.
- Deployed and operated the pipeline on OpenShift SNO over bare-metal Proxmox infrastructure.

SECURITY & NETWORK PROJECTS

AI-Augmented SOC Automation & Incident Response Platform *Jan – Jun 2026*

- Deployed Wazuh SIEM for centralized monitoring across Linux and Windows endpoints.
- Built detection rules for brute-force, privilege escalation, PowerShell attacks.
- Automated SOAR workflows using TheHive, MISP, Cortex, and n8n.
- Integrated an AI/ML layer using a locally hosted LLM for automated alert triage and analyst-oriented incident summaries.

Malware Analysis – njRAT *Apr – Jun 2026*

- Reverse-engineered .NET malware using dnSpy and CFF Explorer.
- Performed dynamic analysis in CAPEv2 sandbox.
- Captured C2 traffic and beaconing behavior using Wireshark.

IP/MPLS Backbone & Network Security Lab *Jan – Mar 2026*

- Designed MPLS network utilizing OSPF, LDP, MP-BGP, and VRF segmentation.
- Implemented redundancy with HSRP, EtherChannel, and DHCP infrastructure.
- Secured network with ACLs and FreeRADIUS AAA authentication.

EDUCATION

TEK-UP University Ariana, Tunisia
Engineering Degree in Security of Computer Systems and Networks 2024 – 2027

IPEIEM El Manar, Tunisia
Preparatory Cycle MP (Mathematics & Physics)

SKILLS & TECHNOLOGIES

DevSecOps & CI/CD:
GitHub Actions, GitLab, DefectDojo, Gitleaks, Semgrep, Bandit, Trivy, Hadolint, Cosign, Kyverno, Falco

Cloud & Infra:
OpenShift, Kubernetes, Docker, Helm, RBAC, NetworkPolicies, Proxmox

SOC & SIEM:
Wazuh, TheHive, MISP, Cortex, Shuffle, n8n, SIEM, SOAR, Incident Response

Threat Detection & Malware:
MITRE ATT&CK, rule engineering, log analysis, CAPEv2, dnSpy, Wireshark

Networking:
MPLS, OSPF, BGP, VRF, ACL, AAA, HSRP, VLANs

Security Tools:
pfSense, OPNsense, Zabbix, Linux, Git

Programming:
Python, C, SQL, Java, JavaScript, ReactJS, NodeJS

Soft Skills:
Problem solving, teamwork, adaptability

Languages:
Arabic (Native), French (Professional), English (Technical working proficiency)

CERTIFICATIONS

- Cisco Networking Academy – Python Essentials 1 & 2
- TryHackMe – Top 6% Global Rank (Profile)
